

2.5.3 IT integration and reforms in the examination procedures and processes (continuous internal assessment and end-semester assessment) have brought in considerable improvement in examination management system of the institution

JRU has a well-established and efficient continuous evaluation system with different types of assessments spread through the duration of each semester. The processes related to the conduct of examinations, declaration of results and award of degrees and diplomas are controlled and monitored by the University Examination Cell. Various reforms have been undertaken in the last five years that have made a positive impact on examination management:

1. Centralized conduct of End-Semester Examinations: Seating and invigilation for end-semester examination are now organized centrally at the university level. This has led to optimal utilization of physical as well as manpower resources, increased vigilance and smooth conduct of the examination.
2. Automation of Examination System: A Exam management Software System has been developed completely with the following features:
 - Enrolment and registration of students
 - Verification of students
 - Flexible to handle any type of course
 - Request for scrutiny/re-evaluation
 - Support for Grading system
 - Student Tracking
 - Compilation and Declaration of Results
 - Printing of Mark sheets, Provisional certificate, degrees, Migration certificate, Transfer certificate and transcripts
 - Online Payment of Examination fee

The automation has resulted in an extensive improvement in the efficiency and transparency of the Examination process and has also provided an effective method for parents and students to track performance.
